Foreword

Personal Health Choices is a joint publication of the Comagine Health and the Nevada Department of Health and Human Services, Division of Health Care Financing and Policy. This report presents general acute care hospital outpatient emergency department discharge billing records data for 15 common medical diagnoses as reported by Nevada’s general acute care hospitals that discharged patients within the period.

The data are available through the standard Uniform Billing form, which is utilized by hospitals to bill for hospital charges. The data include patients who were admitted to a hospital through the emergency department and were not transferred to an inpatient admission. The data identify billed charges, not the actual payments received by the hospital.

The data were compiled by Comagine Health using information from outpatient hospital billing records. This information was gathered and analyzed as part of a contractual agreement between the Department of Health and Human Services and Comagine Health under the authority granted in Section 439B of the Nevada Revised Statutes. Comagine Health reviews the data and requests corrections when errors are found. It is not possible to detect all errors. Comagine Health is not responsible for errors that cannot be found by a review.

Personal Health Choices, Calendar Year 2022

Book 3 – General Acute Care Hospitals, Outpatient Emergency Department Visits
Published June 2024

Introduction

This Book 3 of Personal Health Choices compares 38 of Nevada's general acute care hospitals with respect to 15 common categories of diagnoses that would be treated in the emergency department, defined by Clinical Classification Software Refined (CCSR) using ICD-10-CM diagnosis codes (CCSR: see below). The definitions to all CCSR used in this report can be found on the narrative page for each CCSR grouping.

Clinical Classification Software Refined (CCSR) System

Clinical Classification Software Refined (CCSR) is a group developed by the Agency for Healthcare Research and Quality. It groups diagnosis codes into clinically meaningful categories for reporting.

For this report, Comagine Health grouped specific CCSR into 15 common categories of diagnoses that would be provided by acute care hospital emergency departments.

For more information on CCSR, please visit https://hcup-us.ahrq.gov/toolssoftware/ccsr/ccs_refined.jsp

Additional Information

Personal Health Choices is intended as a source of information regarding the billed charges of hospitals in Nevada and should not be construed as a definitive guide for selecting a hospital to receive medical care. The financial information in this report is based on the hospital billed charges and not the amount that was actually paid to the hospital. Billed charges and paid amounts can differ significantly. This report provides the reader information about one component of health care pricing – emergency department visits. Professional physician and other non-hospital inpatient ancillary health care services are not covered in this report.

Report Navigation

This report includes outpatient emergency department visits from acute care hospitals where the visit occurred in calendar year 2022.

Each CCSR group is introduced with a short narrative that describes the CCSRs included in the group. The narrative information is based on the available data and contains information on the primary diagnosis related to the emergency department visit.

After the narrative, a series of tables and charts are presented that include the number of discharges and the average billed per discharge for the CCSR group. The first table presents statewide averages along with gender and age breakdowns. The first table is followed by three charts to illustrate that same information. Following the charts will be three tables that contain the information by hospital for Clark, Washoe/Carson City and rural counties.

It should be noted that when comparing hospitals, information based on small numbers of cases cannot provide a reliable statistical base upon which information can reflect a given hospital's experience. Rows that include five or fewer discharges are suppressed in this report, but caution should still be used when interpreting the data.

Further, physician charges (including those of surgeons) are normally separate from hospital charges, except in rural areas where some physician services – such as radiology, anesthesia, and laboratory tests – may be included in the hospital charges.

Comagine Health receives patient discharge records directly from all the hospitals included in this report.

General Acute Care Hospitals

Hospital Name	Address	Phone Number	County
Banner Churchill Community Hospital	801 E. Williams Ave., Fallon, NV 89406	(775) 423-3151	Churchill
Battle Mountain General Hospital	535 Humboldt St., Battle Mountain, NV 89820	(775) 635-2550	Lander

CCSR Groups – Discussion and Graphics

1. Pneumonia and Other Specified/Unspecified Respiratory Disease

CCSR: Respiratory congenital malformations (MAL007), Respiratory distress syndrome (PNL005), Respiratory perinatal condition (PNL006), Pneumonia (except that caused by tuberculosis) (RSP002), Other specified and unspecified upper respiratory disease (RSP007), Respiratory failure; insufficiency; arrest (RSP012), Other specified and unspecified lower respiratory disease (RSP016), Postprocedural or postoperative respiratory system complication (RSP017)

Definitions: **Asthma:** Chronic inflammatory disease of the airways. **Bronchitis:** An inflammation of the air passages between the nose and the lungs, including the windpipe or trachea and the larger air tubes of the lung that bring air in from the trachea (bronchi). **Bronchial tubes:** The major airways to the lungs and their main branches. **Croup:** An infection of the upper airway, generally in children, which obstructs breathing and causes a characteristic barking cough. **Larynx:** The structure between the pharynx and the trachea that contains the vocal cords. **Pharynx:** The upper expanded portion of the digestive tube, between the esophagus below and the mouth and nasal cavities above and in front. **Trachea:** A tube-like portion of the respiratory tract that connects the larynx with the bronchial parts of the lungs. Also known as windpipe. **Bronchiolitis:** An acute viral infection of the small air passages of the lungs called the bronchioles. **Bronchioles:** Small airways extending from the bronchi into the lobes of the lungs. **Pneumonia:** Inflammation of the lungs, usually due to infection with bacteria, viruses, or other pathogenic organisms.

2. Headache Including Migraine

CCSR: Headache; including migraine (NVS010)

Definitions: Migraine: A severe recurring headache, usually affecting only one side of the head, that is characterized by sharp pain and is often accompanied by nausea, vomiting, and visual disturbances. **Hypertension:** High blood pressure. **Diabetes mellitus:** A condition in which the pancreas no longer produces enough insulin or cells stop responding to the insulin that is produced, so that glucose in the blood cannot be absorbed into the cells of the body.

3. Upper Respiratory Infections Including Allergic Reactions and Otitis Media

CCSR: Otitis media (EAR001), Allergic reactions (INJ031), Sinusitis (RSP001), Acute bronchitis (RSP005), Other specified upper respiratory infections (RSP006), Other specified and unspecified upper respiratory disease (RSP007)

Definitions: **Otitis media:** An inflammation or infection of the middle ear, common in early childhood. **Pharyngitis:** Inflammation of the pharynx, causing a sore throat. **Bronchitis:** An inflammation of the air passages between the nose and the lungs, including the windpipe or trachea and the larger air tubes of the lung that bring air in from the trachea (bronchi). **Tonsillitis:** Inflammation of the tonsils. **Croup:** An infection of the upper airway, generally in children, which obstructs breathing and causes a characteristic barking cough. **Sinusitis:** Inflammation of a nasal sinus. **Streptococcus:** A genus of nonmotile, non-spore-forming, aerobic to facultatively anaerobic bacteria containing gram-positive, spherical, or ovoid cells that occur in pairs or short or long chains. These organisms occur regularly in the mouth and intestines of humans and other animals, in dairy products and other foods, and in fermenting plant juices. Some species are pathogenic. **Suppurative otitis media:** Otitis media with the presence of purulent fluid in the middle ear. **Purulent:** Containing, discharging, or causing the production of pus.

5. Asthma and Chronic Obstructive Pulmonary Disease (COPD)

CCSR: Chronic obstructive pulmonary disease and bronchiectasis (RSP008), Asthma (RSP009)

Definitions: **Bronchitis:** An inflammation of the air passages between the nose and the lungs, including the windpipe or trachea and the larger air tubes of the lung that bring air in from the trachea (bronchi). **Pharyngitis:** Inflammation of the pharynx, causing a sore throat. **Otitis media:** An inflammation or infection of the middle ear, common in early childhood. **Pneumonia:** Inflammation of the lungs, usually due to infection with bacteria, viruses, or other pathogenic organisms. **Sinusitis:** Inflammation of a nasal sinus. **Bronchiolitis:** An acute viral infection of the small air passages of the lungs called the bronchioles. **Bronchioles:** Small airways extending from the bronchi into the lobes of the lungs.

7. Abdominal Pain

CCSR: Abdominal pain and other digestive/abdomen signs and symptoms (SYM006)

Definitions: **Epigastric region:** The upper central region of the abdomen. **Periumbilical:** Around or near the umbilicus. **Umbilicus:** The vestige left behind on a newborn's belly when the umbilical cord is cut. Also called the navel or belly button. **Colic:** Severe abdominal pain, often caused by spasm, obstruction, or distention of any of the hollow viscera, such as the intestines. **Esophageal reflux:** Regurgitation of the contents of the stomach into the esophagus.

10. Urinary Tract Infections (UTIs)

CCSR: Urinary Tract Infections (GEN004), Biomechanical lesions (MUS012), Calculus of Urinary Tract (GEN005)

Definitions: Urinary Tract Infection (UTI): A urinary tract infection is a very common type of infection in your urinary system. It can involve any part of your urinary system. Bacteria — especially E. coli — are the most common cause of UTIs. Symptoms include needing to urinate often, pain while urinating and pain in your side or lower back. Antibiotics can treat most UTIs. **Calculus of Urinary Tract:** Stones (calculi) are hard masses that form in the urinary tract and may cause pain, bleeding, or an infection or block of the flow of urine.

11. Contusion, Open Wound and Other Trauma to Skin and Subcutaneous Tissue

CCSR: Superficial injury; contusion, initial encounter (INJ017), Superficial injury; contusion, subsequent encounter (INJ054), Injury, sequela (INJ073)

Definitions: Contusion: An injury in which the skin is not broken, often characterized by ruptured blood vessels and discolorations; a bruise. **Abrasion:** A wound caused by rubbing or scraping the skin or a mucous membrane.

13. Viral Illness

CCSR: Viral infection (INF008)

Definitions: **Exanthem:** A skin eruption or rash. **Pharyngitis:** Inflammation of the pharynx, causing a sore throat. **Varicella:** (AKA chickenpox) An acute contagious disease, usually occurring in children, caused by the varicella-zoster virus and marked by a sparse eruption of papules, which become vesicles and then pustules, usually with mild constitutional symptoms; incubation period is about 14-17 days. **Coxsackie virus:** Any of a group of enteroviruses that cause various respiratory, neurological, and muscular diseases in humans. **Enterovirus:** A genus of picornaviruses, including polioviruses, coxsackieviruses, and echoviruses, that infect the gastrointestinal tract and often spread to other areas of the body, especially the nervous system.

14. Pregnancy and Childbirth Related Visits

CCSR: Spontaneous abortion and complications of spontaneous abortion (PRG003); Induced abortion and complications of termination of pregnancy (PRG004); Ectopic pregnancy and complications of ectopic pregnancy (PRG005); Molar pregnancy and other abnormal products of conception (PRG006); Complications following ectopic and/or molar pregnancy (PRG007); Supervision of high-risk pregnancy (PRG008); Early, first or unspecified trimester hemorrhage (PRG009); Hemorrhage after first trimester (PRG010); Early or threatened labor (PRG011); Multiple gestation (PRG012); Maternal care related to fetal conditions (PRG013); Polyhydramnios and other problems of amniotic cavity (PRG014); Obstetric history affecting care in pregnancy (PRG015); Previous C-section (PRG016); Maternal care for abnormality of pelvic organs (PRG017); Maternal care related to disorders of the placenta and placental implantation (PRG018); Diabetes or abnormal glucose tolerance complicating pregnancy; childbirth; or the puerperium (PRG019); Hypertension and hypertensive-related conditions complicating pregnancy; childbirth; and the puerperium (PRG020); Prolonged pregnancy (PRG022); Complications specified during childbirth (PRG023); Malposition, disproportion or other labor complications (PRG024); Anesthesia complications during pregnancy (PRG025); OB-related trauma to perineum and vulva (PRG026); Complications specified during the puerperium (PRG027); Other specified complications in pregnancy (PRG028); Uncomplicated pregnancy, delivery or puerperium (PRG029)

Definitions: **Ectopic pregnancy:** An ectopic pregnancy occurs when a fertilized egg grows outside of the uterus. Almost all ectopic pregnancies—more than 90%—occur in a fallopian tube. **Molar pregnancy:** A molar pregnancy is a complication in which an abnormal mass or tumor forms inside your uterus, instead of a placenta. In a healthy pregnancy, the placenta is an organ that grows in the uterus and nourishes a developing baby through the umbilical cord. **Polyhydramnios:** The buildup of increased amniotic fluid — the fluid that surrounds the baby in the uterus during pregnancy. **Hypertension:** High blood pressure.

15. Mental Health, Substance Abuse and Other Nervous Disorders

CCSR: Anxiety and fear-related disorders (MBD005), Suicidal ideation/attempt/intentional self-harm (MBD012); Alcohol-related disorders (MBD017); Epilepsy; convulsions (NVS009); Syncope (SYM001); Nervous system signs and symptoms (SYM010); General sensation/perception signs and symptoms (SYM015)

Definitions: Syncope: Syncope is also called fainting or "passing out." It most often occurs when blood pressure is too low (a condition called hypotension) and the heart doesn't pump enough oxygen to the brain. It can be harmless or a symptom of an underlying medical condition.
